Biocomposite boards from wheat straw without addition of bonding agents
Materials Science and Technology (United Kingdom) **30**(5):603-610 01 Jan 2014 [doi>](#)
Reporting date: 01 Jan 2014

[This paper was generated from DEFRA funded project where waste wheat straw was being extrusion treated and subsequently compression moulded into usable boards for various applications like partitions, benches and tables etc. without the use of additional bonding agents.](#)
